DETAILED ACTION

Election

Applicant's election without traverse of Group I (claims 1-30) in Paper No. 5 is acknowledged. Claims 31 and 32 are hereby withdrawn from further consideration.

Claim Rejections - 35 USC § 112

Claims 6, 7, 21 and 22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In regard to claims 6 and 21, the specification has not adequately defined the structure of the "flow restriction" in the lumen. The specification does not refer to a flow restrictor and the drawings do not appear to show such a restrictor in the lumen 44. In regard to claims 7 and 22, the specification has not adequately disclosed how the applicator support element 88 is removably engaged between the reservoir and the applicator, i.e., the shown support element 88 is internally mounted within the reservoir and does not appear to be removably engaged between the reservoir and the applicator (see paragraph 0112, which indicates that the support element which can be removably engaged between the reservoir and the applicator is not shown).

Allowable Subject Matter

Claims 1-5, 8-20 and 23-30 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Stern, Vandergrift and Donato references are cited for disclosing other applicator structures.
